Welcome

It has been a busy few months; the guys have been out and about working hard despite the weather. Winter has definitely arrived; break out the flannel PJ's, hot-water bottles, red wine and stoke the fires.

Russell has been out braving the elements keeping his family supplied with lots of delicious fresh fish. He is having lots of fun teaching his three year old daughter the joys of fishing.

Good on the All Whites; unbeaten in the World Cup!!!!!!!

Security News: 80% of CCTV is not fit for purpose

Recent research* shows that police opinion is that up to 80% of CCTV evidence is not fit for purpose. 'As businesses often rely on CCTV footage in employment law or health & safety cases, poor quality CCTV footage, badly presented in court, is easily discredited by a smart lawyer.' It is very important that you know what you want from your CCTV system and that the cameras and DVR give you the images that you need i.e for identification of individuals or vehicle number plates. At Insight EDS we strongly recommend that you try the system (DVR) you like before you buy it—that way you know that it will give you the images you are looking for.

Staff Update

We are lucky to be able to welcome Gareth to our team at Insight EDS. He may be a familiar face to some as he has done contracting work for us over the last few years. He has come on board as a full time technician.

Check out Margaret our fire warden.

What's New: Mobile DVR

Do you need to know where your vehicles are and what is happening inside them? Now you can have GPS and a Digital Recording Device (DVR) with built in camera inside your fleet. The Janus V2 Mobile DVR integrates this technology. This state of the art solution not only records video and CD quality audio but also manages events happening inside and outside the vehicle. For more information and product spec sheet go to What's New at www.insighteds.co.nz

Security Options for your Business

Security systems are more than just alarms or simple barriers - they are a combination of technology and good human practices, ones that offer an efficient and effective method of keeping you and your business secure so you can concentrate on what really matters most, running your business. Why put it off; there's no better time then now to consider any or all of the following:

- Access Control—Alarms & Alarm Monitoring—Physical Security / Locking Devices—CCTV—Biometrics—Home Automation—Security Guards.

The team at Insight EDS are the right people to help you find the right security solution for your building.

Quote for the Quarter

'Anybody can do anything that he imagines'

Henry Ford
